Research Question

- Existing studies of welfare assume fully democratic regime.

Research Question

- Existing studies of welfare assume fully democratic regime.
 - Compensations
 - Median Voters
 - Power resources

Research Question

- Existing studies of welfare assume fully democratic regime.
 - Compensations
 - Median Voters
 - Power resources
- How can we explain?
 - why do authoritarian regimes provide welfare?
 - are there variations of authoritarian welfare states?

Understanding of Welfare states

Definition

- A state in which organized power is deliberately used to modify the play of market forces.
- Minimum income, social insurance, and universal services
- The structure of class coalitions presses govt. toward specific types of welfare state (Esping-Andersen 1990).
- For example, red-green alliance of Sweden → universal

Welfare Regimes in Autocracies

- Leaders maintain coalitions of supporters by public, private goods (Bueno de Mesquita, Morrow and Smith 2003).
- Autocracies have different coalitions (Gandhi and Lust-okar 2009; Levitsky and Way 2010).
- Autocrats also have incentives to provide public goods (Wintrobe 1998)

Welfare Regimes in Autocracies

- Leaders maintain coalitions of supporters by public, private goods (Bueno de Mesquita, Morrow and Smith 2003).
- Autocracies have different coalitions (Gandhi and Lust-okar 2009; Levitsky and Way 2010).
- Autocrats also have incentives to provide public goods (Wintrobe 1998)

The problem is ***who is the target?***.

Classes

In authoritarian regimes,

- welfare = co-optation
- Extent of welfare depends on class.

Assumption: individuals in similar strata have converging preferences over social policies.

- Income-based: **middle class** and **working class**
- Institutional-based: **party elite** and **military**

Classes

- 1 Middle class can be heterogeneous. (Dahlum, Knutsen and Wig 2019).
 - Urban middle class → higher leverage
- 2 Working class
 - Rural working class also affected by urbanization, industrialization.
 - Elites have tried to co-opt both (e.g., the Russian Revolution).
- 3 The party elite and the military
 - Specific institutions create class of elites with distinct interests, incentives.

Class Coalitions

- Different classes → different welfare programs.
 - Democratization literature emphasizes threats of middle class.
 - Working class prefers more extensive welfare than middle.
 - Working class more sensitive to change in distribution of wealth, welfare.

Class Coalitions

- Different classes → different welfare programs.
 - Democratization literature emphasizes threats of middle class.
 - Working class prefers more extensive welfare than middle.
 - Working class more sensitive to change in distribution of wealth, welfare.
- Hypotheses (H_1): Working class has greater influence on universal welfare programs than the middle class.

Alternative: Party Institutionalization

- Recent works focus on capacity of parties to provide public goods.
 - Autocrats with institutionalized parties → universal welfare programs (Rasmussen and Knutsen 2019).
 - Institutionalized party helps distribute resources.

Alternative: Party Institutionalization

- Recent works focus on capacity of parties to provide public goods.
 - Autocrats with institutionalized parties → universal welfare programs (Rasmussen and Knutsen 2019).
 - Institutionalized party helps distribute resources.
- Hypotheses (H_2): Higher levels of party institutionalization increase welfare programs universality.

Sample Selection

Authoritarian Regimes:

Dataset and methods

- Coverage: 95 authoritarian states from 1917-2000 (unbalanced)
- Essential data source
 - Social Policies around the World data set
 - Variety of Democracies (V-Dem) data set
- Variable
 - DV: Welfare programs (social coverage and delivery)
 - EV: Class coalitions (working, urban middle, party elites, and military)
 - CV: Logged GDP per capita (V-Dem), logged of population, and resource dependence (Miller 2015)

Dataset and methods

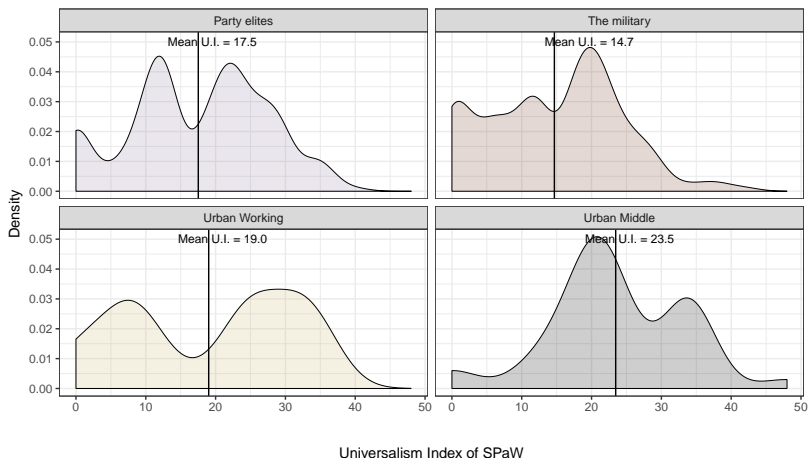

Figure: The distribution of universal indices by classes in Autocracies

Empirical Analysis

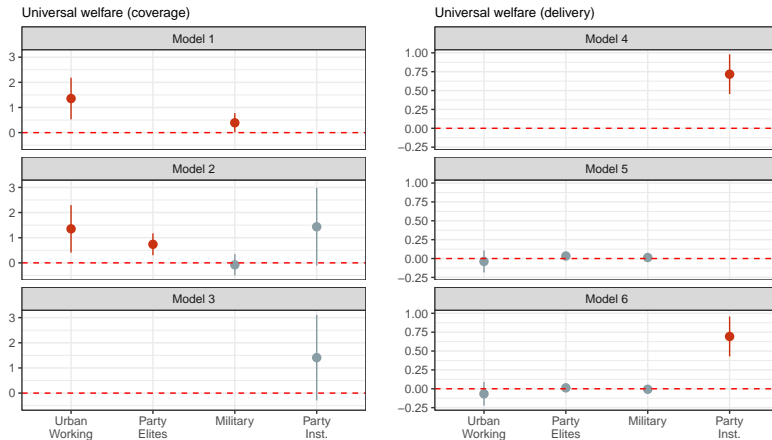

Figure: Class coalitions, Party Institutionalization, and Welfare Universalism

Empirical Analysis

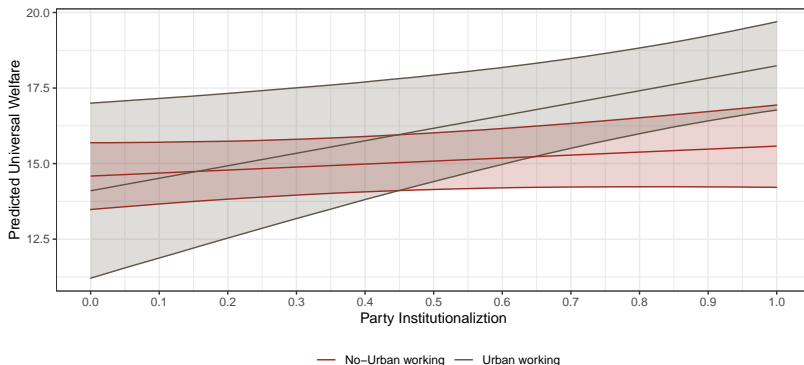

Figure: Predicted Universal Welfare of Working Class by Party Institutionalization (95% CI)

Conclusion

- 1 In autocracies, class differences exist.

Conclusion

- 1 In autocracies, class differences exist.
 - Working class is greater than middle class in universal welfare
 - Class coalition matters in autocracies

Conclusion

- 1 In autocracies, class differences exist.
 - Working class is greater than middle class in universal welfare
 - Class coalition matters in autocracies
- 2 The relationship affected by party institutionalization.

Conclusion

- 1 In autocracies, class differences exist.
 - Working class is greater than middle class in universal welfare
 - Class coalition matters in autocracies
- 2 The relationship affected by party institutionalization.
 - It means when I include it, class differences disappear.
 - Institutionalized parties matter (consistent with recent works).

Conclusion

- 1 In autocracies, class differences exist.
 - Working class is greater than middle class in universal welfare
 - Class coalition matters in autocracies
- 2 The relationship affected by party institutionalization.
 - It means when I include it, class differences disappear.
 - Institutionalized parties matter (consistent with recent works).
- 3 Effect of coalitions are mediated by parties that emerge to capture them in autocracies.
